Addendum No. 3
Issued: September 17, 2013

This Addendum No. 3 is issued and hereby published on the DGS website on September 17, 2013. Except as modified hereby, the Request for Proposals ("RFP") remains unmodified.

Item #1

Section B – Scope of Work has been modified to include the following:

B.3.30 At the beginning of the construction phase, the Contractor shall perform a visual investigation to assess the current condition of the full extent of the garage concrete slabs. If the extent of deterioration noted on the construction documents has increased, or if new areas of deterioration have developed since the issuance of the construction documents, these areas shall be reported by the Contractor to the design team (Bell Architects and RSA) through DGS before any work beyond visual investigation is performed. The Contractor shall perform a thorough survey by means of chain drag and delamination sounding devices or other means and methods to areas indicated on the current drawings that have slightly increased to quantify the extent of the additional deterioration. If areas with new conditions require repairs not addressed in the drawings, the design team will provide the appropriate solution. The construction work for these new conditions will be the basis for additional services. Inspections required by the local jurisdiction will be performed by a testing agency provided by the Contractor.
